Printed in Great Britain at the University Printing House, Cambridge

CONTENTS

No. 1 (February 1971)

YOSHIKAWA, MASANOSUKE. Drug sensitivity and mutability to drug resistance associated with the presence of an R factor *page* 1

YOSHIKAWA, MASANOSUKE. Selective enrichment of R⁻ segregants as the main mechanism of 'curing' of the R factor by acridine dyes 9

MAJISU, B. N. and JONES, J. K. *Aegilops* × *Secale* hybrids: the production and cytology of diploid hybrids 17

DAVIES, D. ROY and PLASKITT, A. Generical and structural analyses of cell-wall formation in *Chlamydomonas reinhardii* 33

GUTZ, HERBERT. Gene conversion: remarks on the quantitative implications of hybrid DNA models 45

CARLSON, PETER S. A genetic analysis of the *rudimentary* locus of *Drosophila melanogaster* 53

TSUJI, SHIGEKATSU and MEIER, HANS. Evidence for allelism of leaner and tottering in the mouse 83

GRINDLEY, N. D. F., ANDERSON, E. S., SMITH, H. R. and GRINDLEY, JUNE N. The effects of *Salmonella typhimurium* on de-repressed mutants of F-like factors 89

No. 2 (April 1971)

SCOWCROFT, W. R. and LATTER, B. D. H. Decanalization of scutellar bristle number in *Drosophila* 95

YTTERBORN, KARL H. Influence of the population genetic background on the persistency of a recessive lethal in *Drosophila melanogaster* 103

BURNET, BARRIE and HARTMANN-GOLDSTEIN, INGEBORG. Environmental influences on puffing in the salivary gland chromosomes of *Drosophila melanogaster* 113

PUTRAMENT, ALEXANDRA, ROZBICKA, TERESA and WOJCIECHOWSKA, KATARZYNA. The highly polarized recombination pattern within the methA gene of *Aspergillus nidulans* 125

ARMSTRONG, F. B. and SPRAGUE, GEORGE F., JR. Salmonella hybrids containing genic material of multiple origins 133

XUM

BALLANTYNE, G. H. and CHOVNICK, ARTHUR. Gene conversion in higher organisms: Non-reciprocal recombination events at the rosy cistron in *Drosophila melanogaster* *page* 139

COOPER, PEARL. Interaction of a colicinogenic factor with a resistance factor and with the fertility factor F in *Escherichia coli* K-12 151

DONCH, J. J., GREEN, M. H. L. and GREENBERG, J. Conditional induction of λ prophage in *exr*A mutants of *Escherichia coli* 161

SHAW, DAVID S. and KHAKI, IKRAM A. Genetical evidence for diploidy in Phytophthora 165

STANISICH, VILMA A. and HOLLOWAY, B. W. Chromosome transfer in *Pseudomonas aeruginosa* mediated by R factors 169

No. 3 (June 1971)

METCALFE, JUDITH A. Development and complementation of lethal mutations at the dumpy locus of *Drosophila melanogaster* 173

DONCH, JOHN J., SUP CHUNG, YOUNG, GREEN, MICHAEL H. L., GREENBERG, JOSEPH and WARREN, GUYLYN. Genetic analysis of *sul* mutants of *Escherichia coli* B 185

HUNT, DAVID M. The physiological control of gene action in the *eyeless* and *eyegone* mutants of *Drosophila melanogaster* 195

BENNETT, M. D. and FINCH R. A. Duration of meiosis in barley 209

FALCONER, D. S. Improvement of litter size in a strain of mice at a selection limit 215

HOUGHTON, J. A. Biochemical investigation of the slow-growing non-perithecial (*sgp*) mutants of *Aspergillus nidulans* 237

GALE, M. D. and REES, H. The production and assay of segmental substitution lines in barley 245

MCLAREN, ANNE. The microscopic appearance of waved-2 mouse hairs 257

ACHTMAN, MARK. A semi-automatic technique for conducting many bacterial matings concurrently 261

GRINDLEY, JUNE N. and ANDERSON, E. S. I-like resistance factors with the fi^+ character 267

ARST, HERBERT H., JR. Mutants of *Aspergillus nidulans* unable to use choline-0-sulphate 273

KAPLAN, PHILIPPA and WALLS, D. A technique for replica plating *Coprinus lagopus*, a filamentous fungus 279

VOLUME XVII

INDEX OF SUBJECTS AND AUTHORS

Only main topics are listed, and reference is given to the first page of each paper in which they are discussed

Achtman, M., 261
Acridine dyes, curing mechanism on R factor, 9
Aegilops, production and cytology of interspecific hybrids, 17
Anderson, E. S., 89, 267
Armstrong, F. B., 133
Aspergillus nidulans, biochemical study of slow-growing, non-perithecial mutants, 237
  mutants defective in choline-0-sulphate utilization, 273
  recombination pattern in methA gene, 125
Arst, H. N., 273

Bacterial matings, technique for conducting many concurrently, 261
Ballantyne, G. H., 139
Barley, duration of meiosis, 209
  effects of chromosome substitution, 253
  translocation stocks, 249
Bennett, M. D., 209
Burnet, B., 113

Carlson, P. S., 53
Cell wall, formation in *Chlamydomonas reinhardi*, 33
Chlamydomonas reinhardi, study of cell-wall formation, 33
  electron microscope analyses, 36
  genetic analyses, 37
Chovnik, A., 139
Chromosome, association frequencies in *Aegilops* × *Secale* hybrids, 22–24
  chiasmate and non-chiasmate association, 24
  implications of association types, 26
  puffing, environmental influence in *Drosophila*, 113
  transfer in *Pseudomonas aeruginosa*, 169
Chung, Y. S., 185
Colicinogenic factor, interaction with R factor and F factor in *Escherichia coli* K-12, 151
Complementation, at dumpy locus of *Drosophila melanogaster*, 173
  at rudimentary locus of *Drosophila melanogaster*, 57
  map of rudimentary locus of *Drosophila melanogaster*, 60
Conditional induction of λ prophage in *exrA* mutants of *Escherichia coli*, 161
Cooper, Pearl, 151
Coprinus lagopus, replica plating technique, 279
Curing of R factor by acridine dyes, 9
Cytology of *Aegilops* × *Secale* diploid hybrids, 17, 20

Davies, D. R., 33
De-repressed F-like factors in *Salmonella typhimurium*, 89
Donch, J. J., 161, 185
Drosophila melanogaster, decanalization of scutellar bristle number, 95
  dumpy locus, lethal mutations, 173
  eyeless, eyegone, physiological control of gene action, 195
  puffing, environmental influences, 113
  frequency, 118, 119
  recessive lethal, effect on population, 103
  rosy cistron, gene conversion, 139
  rudimentary locus, complementation map, 60
  fine structure map, 61
  genetic analysis, 53
  intragenic recombination, 67
  map expansion, 70
Drug sensitivity and mutability to resistance in *Escherichia coli* K-12, 1

Escherichia coli B, *sul* mutants, 185
  K-12 conditional induction of λ prophage, 161
  curing of R factor by acridine dyes, 9
  drug sensitivity and mutability to resistance interaction of colicinogenic, resistance, I, and F factors, 151
Embryo hybrid culture, 18

Falconer, D. S., 215
F-factor, interaction with colicinogenic and resistance factor in *Escherichia coli* K-12, 151
Finch, R. A., 209
F-like factors in *Salmonella typhimurium*, 89

Gale, M. D. 245
Gene conversion, quantitative implications of hybrid DNA models, 45
Green, M. H. L., 161, 185
Greenberg, J., 161, 185
Grindley, June N., 89, 267

XUM

Grindley, N. D. F., 89
Gutz, H., 45

Hartmann-Goldstein, I., 113
Holloway, B. W., 169
Hordeum vulgare, duration of meiosis, 209
  effects of chromosome substitution, 253
  segmental substitution lines, 245
  translocation stocks, 249
Houghton, J. A., 237
Hunt, D. M., 195
Hybrid DNA models, quantitative implications, 45
Hybrids, *Aegilops* × *Secale* diploids, production and cytology, 17
  embryo culture, 18

I-like resistance factors with *fi*+ character, 267
Inbreeding, effects on litter size, 215
Interspecific hybridization *Aegilops* × *Secale*, 17
Intragenic recombination, rudimentary locus of *Drosophila melanogaster*, 67

Jones, J. K., 17

Kaplan, Philippa, J., 279
Khaki, I. A., 165

Latter, B. D. H., 95
Litter size in mice at selection limit, 215

Majisu, B. N., 17
McLaren, Anne, 257
Meier, H., 83
Meiosis, duration in barley, 209
Metcalfe, Judith A., 173
Mouse, allelism of leaner and tottering, 83
  litter size improvement at selection limit, 215
  microscopic appearance of waved-2 hairs, 257
Mutants
  Aspergillus nidulans, slow-growing non-perithecial, 237
  Chlamydomonas reinhardi, cell-wall studies, 33
  Drosophila melanogaster, eyeless and eyegone, 195
    lethal mutations at dumpy locus, 173
    recessive lethal, 103
    rosy cistron, 139
    rudimentary locus, 53
    scutellar bristles, 95
  Escherichia coli, *exrA* mutants, 161
    sul mutants, 185
  Mouse, leaner and tottering, 83
  Salmonella typhimurium, de-repressed F-like factors, 89
Mutation, drug resistance in presence of R factor, 1

Phytophthora drechsleri, evidence for diploidy, 165
Plaskitt, A., 33
Prophage, induction of λ in *exrA* mutants of *Escherichia coli*, 161
Pseudomonas aeruginosa, chromosome transfer, 169
Putrament, Alexandra, 125

Recombination, *Aspergillus nidulans*, in methA gene, 125
  Drosophila melanogaster, at rosy cistron, 139
Rees, H., 245
Resistance factors, affecting drug-resistance mutability, 1
  curing by acridine dyes, 9
  fi+ character in I-like factors, 267
  interaction with colicinogenic and F factors in *Escherichia coli* K-12, 151
  mediating chromosome transfer in *Pseudomonas aeruginosa*, 169
Rozbicka, Teresa, 125
Rudimentary locus of *Drosophila melanogaster*, 53
  complementation map, 60
  fine structure map, 61
  intragenic recombination, 67
  map expansion, 70

Salmonella typhimurium, curing by acridine dyes, 9
  effects on de-repressed F-like factors, 89
  hybrids, 133
Scowcroft, W. R., 95
Secale production and cytology of diploid hybrids, 17
Selection, enrichment of R⁻ segregants, 9
  limit in mice, litter size, 215
Shaw, D. S., 165
Shigella flexneri, curing by acridine dyes, 9
Smith, H. R., 89
Sprague, G. F., 133
Stanisich, Vilma A., 169

Tsuji, S., 83

Walls, D., 279
Warren, Guylyn, 185
Wojciechowska, Katarzyna, 125

Yoshikawa, M., 1, 9
Ytterborn, K. H., 103

CONTENTS

No. 1 (August 1971)

McNew, Ronald W. and Bell, A. E. The nature of the purebred-crossbred genetic covariance *page* 7

Hedges, R. W. Transduction mechanisms of bacteriophage ϵ^{15}. I. General properties of the system 9

Hedges, R. W. Transduction mechanisms of bacteriophage ϵ^{15}. II. Isolation of a bacteriophage related to ϵ^{15} 21

Hedges, R. W. Transduction mechanisms of bacteriophage ϵ^{15}. III. A new class of mutations affecting the conversion of *Salmonella anatum* by bacteriophage ϵ^{15} 29

Pourquié, J. and Heslot, H. Utilization and interconversions of purine derivatives in the fission yeast *Schizosaccharomyces pombe* 33

Oishi, Kugao. Spirochaete-mediated abnormal sex-ratio (SR) condition in *Drosophila*: A second virus associated with spirochaetes and its use in the study of the SR condition 45

Mitra, R. and Bhatia, C. R. Isoenzymes and polyploidy. I. Qualitative and quantitative isoenzyme studies in the Triticinae 57

Johnson, D. R. Genes and genotypes affecting embryonic fluid relations in the mouse 71

Maruyama, Takeo. An invariant property of a structured population 81

Putrament, Aleksandra. Recombination and chromosome structure in eukaryotes 85

Sved, J. A. An estimate of heterosis in *Drosophila melanogaster* 97

Starling, David and Randall, Sir John. The flagella of temporary dikaryons of *Chlamydomonas reinhardii* 107

Grimes, Gary W. and Preer, John, R. Jr. Further observations on the correlation between kappa and phage-like particles in paramecium 115

Vyse, E. R. and Sang, J. H. A purine and pyrimidine requiring mutant of *Drosophila melanogaster* 117

No. 2 (October 1971)

Kimura, Motoo and Maruyama, Takeo. Pattern of neutral polymosphism in a geographically structured population 125

Sermonti, G., Puglia, A. Maria and Ficarra, Giuseppina. The time course of recombinant production in *Streptomyces coelicolor* 133

Thornton, R. J. and Johnston, J. R. Rates of spontaneous mitotic recombination in *Saccharomyces Cerevisiae* 147

XUM

North, Jane and Lewis, D. Phosphatases of *Coprinus lagopus*: the conditions for their production and the genetics of the alkaline phosphatase *page* 153

Upshall, A. Phenotypic specificity of aneuploid states in *Aspergillus nidulans* 167

Pinney, R. J. and Smith, J. T. R-Factor elimination by thymine starvation 173

Johnston, J. R. Genetic analysis of spontaneous half-sectored colonies of *Saccharomyces cerevisiae* 179

Dunn, N. W. and Holloway, B. W. Pleiotropy of *p*-fluorophenylalanine-resistant and antibiotic hypersensitive mutants of *Pseudomonas aeruginosa* 185

Paszewski, A., Prażmo, W. and Jaszczuk, E. Multiple recombinational events within the 84W locus of *Ascobolus immersus* 199

Searle, A. G., Ford, C. E. and Beechey, C. V. Meiotic disjunction in mouse translocations and the determination of centromere position 215

Gale, Michael D. and Flavell, Richard B. The genetic control of anthocyanin biosynthesis by homoeologous chromosomes in wheat 237

No. 3 (December 1971)

Latter, B. D. H. Quantitative genetic analysis in *Phalaris tuberosa*. III. Maternal effects on seedling growth and development 245

Lamb, B. C. Some details and effects of the premeiotic controls of recombination frequencies in *Neurospora crassa* 255

Sharat Chandra, H. Inactivation of whole chromosomes in mammals and coccids: some comparisons 265

Ohta, Tomoko. Associative overdominance caused by linked detrimental mutations 277

Foster, T. J. and Howe, T. G. B. Recombination and complementation between R factors in *Escherichia coli* K12 287

Day, A. W. and Jones, J. K. *p*-Fluorophenylalanine-induced mitotic haploidization in *Ustilago violacea* 299

Wall, A. M., Riley, Ralph and Chapman, Victor. Wheat mutants permitting homoeologous meiotic chromosome pairing 311

Wall, A. M., Riley, Ralph and Gale, M. D. The position of a locus on chromosome 5B of *Triticum aestivum* affecting homoeologous meiotic pairing 329

Moore, David and Stewart, George R. Mutants of *Coprinus lagopus* selected for resistance to 2-Deoxy-D-glucose 341

Hedges, R. W. A simple technique for the identification of chain termination suppressor mutants in species of *Salmonella* 353

VOLUME 18

INDEX OF SUBJECTS AND AUTHORS

Only main topics are listed, and reference is given to the first page of each paper in which they are discussed

Alkaline phosphatase, genetics in *Coprinus*, 153
Aneuploidy, phenotypic specificity in *Aspergillus*, 167
Anthocyanin, control of biosynthesis in wheat, 237
  separation by chromatography, 238
Ascobolus immersus, map of 84 W locus, 203
  multiple recombination at 84 W locus, 199
Aspergillus nidulans, phenotypic specificity of aneuploid states, 167
Associative overdominance, due to linked detrimental mutations, 277

Bacteriophage, complementation of ϵ^{γ} and v^{15}, 21
  isolation of v^{15}, 21
  mutations affecting conversion of *Salmonella anatum* by ϵ^{15}, 29
  recombination of ϵ^{γ} and v^{15}, 21
  transduction by ϵ^{15}, 9, 21
Beechey, C. V., 215
Bell, A. E., 1
Bhatia, C. R., 57

Centromere, determination of position in mouse, 215
Chain termination suppressors in *Salmonella*, 353
Chandra, Sharat, H. 265
Chapman, Victor, 311
Chlamydomonas reinhardii, flagella of temporary dikaryons, 107
Chromosome, inactivation in mammals and coccids, 265
  pairing of homoeologues in wheat, 311, 329
  structure and recombination in eukaryotes, 85
Complementation between R factors in *E. coli*, 287
Coprinus lagopus, mutants resistant to 2-Deoxy-D-Glucose, 341
  pho loci mapping, 163
  production and genetics of phosphatases, 153
  reg loci mapping, 162
Covariance, nature of purebred–crossbred, 1

Day, A. W., 299
Disjunction in mouse translocations, 215
Drosophila melanogaster, estimation of heterosis, 97
  purine and pyrimidine requiring mutant, 117
  spirochaete virus affecting sex ratio, 45
Dunn, N. W., 185

Embryonic fluid relations in mouse, 71
Epistatic models, in study of covariance, 2
Escherichia coli K12, curing of R factor by thymine starvation, 173
  R factor recombination and complementation, 287

Ficarra, Giuseppina, 133
Flavell, Richard B., 237
Ford, C. E., 215
Fructose transport mutants of *Coprinus*, 343

Gale, Michael D., 237, 329
Grimes, Gary W., 115

Hedges, R. W., 9, 21, 29, 353
Heslot, H., 33
Heterosis, estimation in *Drosophila*, 97
Holloway, B. W., 185
Howe, T. G. B., 287

Inactivation of whole chromosomes, 267
Isoenzymes in *Triticinae*, 57

Jaszczuk, E., 199
Jones, J. K., 299
Johnson, D. R., 71
Johnston, J. R., 147, 179

Kappa particles, correlation with phage-like particles in *Paramecium*, 115
Kimura, Motoo, 125
Klebsiella aerogenes, curing of R factor by thymine starvation, 173

Lamb, B. C., 255
Latter, B. D. H., 245
Lewis, D., 153

Maruyama, Takeo, 81, 125
McNew, R. W., 1
Meiotic chromosome pairing of homoeologues in wheat, 311, 329

XUM

Meiotic disjunction in mouse translocations, 215
Mitotic haploidisation induced by p-fluorophenylalanine in *Ustilago violacea*, 299
Mitra, R., 57
Moore, David, 341
Mouse, determination of centromere position, 215
effects of genes and genotypes on embryonic fluid relations, 71
meiotic disjunction in translocations, 215

Neurospora crassa, premeiotic control of recombination frequencies, 255
North, Jane, 153

Ohta, Tomoko, 277
Oishi, Kugao, 45
Overdominance association caused by linked detrimental mutations, 277

Paramecium aurelia, correlation between kappa and phage-like particles, 155
Paszewski, A., 199
Phalaris tuberosa, maternal effects on seedling growth and development, 245
Phosphatases of *Coprinus lagopus*, 153
Pinney, R. S., 173
Pleiotropy of p-fluorophenylalanine-resistant and antibiotic hypersensitive mutants of *Pseudomonas*, 185
Polymorphism pattern in geographically structured, population, 125
Polyploidy in *Triticinae*, 57
Population studies, invariant property of structured population, 81
neutral polymorphism in geographically structured population, 125
Pourquié, J., 33
Prazmo, W., 199
Preer, John, R. Jnr., 115
Pseudomonas aeruginosa, pleiotropy of p-fluorophenylalanine resistant and antibiotic hypersensitive mutants, 185
Puglia, A. Maria, 133
Purine, metabolism in fission yeast, 33
requiring mutant of *Drosophila*, 117
Putrament, Aleksandra, 85
Pyrimidine requiring mutant of *Drosophila*, 117

Randall, Sir John, 107
Recombination, between R factors in *E. coli*, 287
chromosome structure in eukaryotes, 85
intra- and inter-genic, influenced by genetic factors, 88
multiple events of 84 W locus in *Ascobolus*, 199
premeiotic control of frequencies in *Neurospora*, 255
role of chromosomal and synaptinemal protein complexes, 89
spontaneous mitotic in yeast, 147
time course of recombinant production in *Streptomyces*, 133
Riley, Ralph, 311, 329
R. factor, elimination by thymine starvation, 173
recombination and complementation, 287

Saccharomyces cerevisiae, genetic analysis of spontaneous half-sectored colonies, 179
spontaneous mitotic recombination, 147
Salmonella anatum, chain termination suppressors, 353
transduction, by bacteriophage ϵ^{15}, 9, 21, 29
transduction, by bacteriophage ϵ^{15} mutants affecting conversion, 29
Sang, J. H., 117
Schizosaccharomyces pombe, purine metabolism, 33
Searle, A. G., 215
Sex-ratio abnormality (SR) caused by a spirochaete virus in *Drosophila*, 45
Smith, J. T., 173
Starling, David, 107
Stewart, George, R., 341
Streptomyces coelicolor, time course of recombinant production, 133
Sved, J. A., 97

Thornton, R. J., 147
Thymine starvation in curing R factors, 173
Transduction by phage ϵ^{15},
mechanisms, 9, 21, 29
lactose genes, 9
arabinose genes, 9
penicillin resistance, 9
Triticinae, isoenzymes and polyploidy, 57
Triticum aestivum, control of anthocyanin biosynthesis, 237
mutants allowing meiotic pairing of homoeologues, 311, 329

Ustilago violacea, mitotic haploidisation, 299

Vyse, E. R., 177

Wall, A. M., 311, 329
Wheat, control of anthocyanin biosynthesis, 237
homoeologous chromosome pairing, 311, 329
isoenzymes and polyploidy, 57
